² Longer investment timeframes maximise the benefits of investment compounding, especially for medium and higher taxed investors doing this under an Education Bond's Tax-Paid investment structure. Education Bonds also have an 'Investment Bond 10-Year Advantage' meaning the benefits of Tax-Free access to your Bond after 10 years from its Commencement Date, subject to certain conditions as explained in Part A of our PDS.

^{*} Performance is measured by Investment Option price movements (after Tax and Management fees). It is quoted using the sell (exit) price and is net of all portfolio taxes, management fees, and fund expenses, however does not take into account any stamp duty, transaction costs and management fee rebates. Past performance is not a reliable indicator of future performance.

GENERAL MARKET UPDATE

Global equity markets rose in June 2025 despite geopolitical tensions and fiscal uncertainties. The MSCI World ex Australia rose 4.3% for the month, driven by US mega-cap and AI stocks. The S&P500 hit a record high, while emerging markets also rallied. Fiscal expansion in the US and Europe, alongside expectations of interest rate cuts, supported investor sentiment.

Australian equities posted solid gains, with the ASX200 up 1.4% in June and 9.5% for the quarter. Despite weak GDP growth, easing inflation and strong labour market indicators bolstered expectations of RBA interest rate cuts. The banking sector, led by CBA, rallied sharply, supported by global allocations and benchmark risk management. Energy and diversified financials outperformed, while consumer staples underperformed. AREITs rebounded strongly.

Emerging markets rose 6% in June 2025, led by South Korea and Taiwan. China showed signs of stabilisation, though property sector weakness and deflationary pressures persist.

Bond yields fluctuated amid fiscal concerns and tariff risks. US inflation eased, prompting dovish signals from some Federal Reserve members. The European Central Bank cut rates again, while the Bank of England held steady amid stagflation risks. Australian yields remained stable, with markets pricing in further interest rate cuts.

Commodities were volatile; oil spiked on Middle East conflict but settled post-ceasefire. Gold and copper rose, while iron ore declined. The USD weakened significantly, boosting the AUD, which ended June at 65.8 cents.
