Investment Risk Rating*

Medium – 4

Investment Objective, Strategy and Benchmark

To outperform (before fees and tax) the Investment Option's Performance Benchmark – a weighted average mix of market indices relevant to the Option's long-term strategic asset allocation. It may invest in one or multiple UMFs and/or directly invest in Authorised Investments to have an actively managed conservative portfolio.

¹ Total Management Fees is provided on an after-taxation basis and comprised of the Futurity Management Fees and UMF Investment Fees (includes the estimated UMF indirect costs) – see 'Fees and Other Costs' – Part A of PDS.

² Longer investment timeframes maximise the benefits of investment compounding, especially for medium and higher taxed investors doing this under an Education Bond's Tax-Paid investment structure. Education Bonds also have an 'Investment Bond 10-Year Advantage' meaning the benefits of Tax-free access to your Bond after 10 years from its Commencement Date, subject to certain conditions as explained in Part A of our PDS.

* Performance is measured by Investment Option price movements (after Tax and Management fees). It is quoted using the sell (exit) price and is net of all portfolio taxes, management fees, and fund expenses, however does not take into account any stamp duty, transaction costs and management fee rebates. Past performance is not a reliable indicator of future performance.

ABOUT THE INVESTMENT MANAGER
MLC

MLC has been looking after the investment needs for generations of Australians. MLC believes the best way to manage portfolios is to employ the skills of multiple specialist investment managers.

MLC's investment experts research hundreds of investment managers from around the world and select the managers they believe are the best for their portfolios.

MLC's investment experts have extensive knowledge and experience at designing and managing portfolios using a multi-manager investment approach.

MLC's investment experts do this by:

- Adjusting the allocations to the asset classes away from the benchmark asset allocation, while aiming to remain within the defined ranges.
- Researching and selecting a broad range of mainstream asset classes, and including some exposure to alternative assets and strategies.
- Researching hundreds of investment managers from around the world and selecting the managers they believe are the best for the Portfolio. These investment managers, who are mainly active managers, choose many companies and securities in Australia and overseas for investment.

MLC makes sophisticated investing straightforward.

ASSET MANAGEMENT

PERFORMANCE HISTORY

**Futurity Diversified Active – Conservative
at 30 June 2026³**

1 Mth	3 Mths	6 Mths	1 Yr	2 Yrs	3 Yrs	4 Yrs	5 Yrs
0.72%	2.87%	1.76%	3.44%	3.98%	4.21%	3.91%	2.24%

³ Other costs relating to the operation of the Investment Option can be charged directly to the Investment Option or reimbursed to Futurity if paid by the Management Fund e.g. acquisition, disposal, valuation and transaction costs, such as brokerage, state duty, insurance, custody, as well as auditor, actuary and legal fees. They are reflected in the Unit Price and capped to a maximum of 0.1% pa, with any excess absorbed by the Management Fund.

**END OF FINANCIAL YEAR MARKET SUMMARY (2025-26)**

The 2025–26 financial year was characterised by resilient global economic growth, ongoing inflation pressures, rapid advances in artificial intelligence (AI) investment, and periods of heightened geopolitical uncertainty. Global share markets delivered strong returns, supported by robust corporate earnings and continued investment in AI-related infrastructure, semiconductors and data centres. Emerging markets, particularly those with exposure to technology supply chains, were among the strongest performers.

Australian equities generated positive returns but lagged global markets, reflecting more modest earnings growth, limited technology exposure and the impact of higher interest rates on households and businesses. The resources sector benefited from

stronger commodity prices, while the domestic economy faced challenges from persistent inflation, softer consumer confidence and rising borrowing costs.

Bond markets experienced ongoing volatility as investors balanced expectations for lower interest rates against concerns about inflation and geopolitical risks. Longer-term bond yields remained elevated, although fixed interest assets continued to provide diversification benefits within portfolios.

Overall, diversified investors were rewarded by strong global equity markets, while maintaining a focus on long-term investment objectives remained important amid an evolving economic and geopolitical landscape.

Futurity Investment Group Limited ABN 21 087 648 879, AFSL 236665 (Futurity) is the product issuer of Futurity's Education Bonds (Education Bonds).

This document has been prepared for the purpose of providing general information, without taking account of any individual's objectives, financial situation or needs. Before making any investment decision (including switching between Investment Options), personal circumstances need to be considered.

It is important that prospective or existing Bond Owners read the relevant Combined Financial Services and Product Disclosure Statement (PDS) (available on our website www.futurityinvest.com or by calling us on 1300 345 456) before deciding to acquire, to switch between Investment Options or dispose of Education Bonds.

The licensed financial adviser remains responsible for any advice/services provided to clients including making their own inquiries and ensuring advice/services are appropriate and in accordance with all legal requirements. Therefore, any advice/services must not be attributed to Futurity or in any way suggest that Futurity is the author of the advice/services. Any representations or statements made beyond those stated in the PDS are expressly disclaimed.

Neither Futurity nor any of the underlying fund managers guarantee (whether expressly or impliedly) the repayment of capital or the performance of the Education Bond or any individual Investment Option. The Investment Options are subject to investment and market risks, which could include delays in repayment and loss of earnings and capital invested.
