**Investment Objective, Strategy and Benchmark**

To outperform (before fees and tax) the Investment Option’s Performance Benchmark – a weighted average mix of market indices relevant to the Option’s long-term strategic asset allocation. It may invest in one or multiple UMFs and/or directly invest in Authorised Investments to have an actively managed balanced portfolio.

<sup>1</sup> Total Management Fees is provided on an after-taxation basis and comprised of the Futurity Management Fees and UMF Investment Fees (includes the estimated UMF indirect costs) – see ‘Fees and Other Costs’ – Part A of PDS.

<sup>2</sup> Longer investment timeframes maximise the benefits of investment compounding, especially for medium and higher taxed investors doing this under an Education Bond’s Tax-Paid investment structure. Education Bonds also have an ‘Investment Bond 10-Year Advantage’ meaning the benefits of Tax-Free access to your Bond after 10 years from its Commencement Date, subject to certain conditions as explained in Part A of our PDS.

\* Performance is measured by Investment Option price movements (after Tax and Management fees). It is quoted using the sell (exit) price and is net of all portfolio taxes, management fees, and fund expenses, however does not take into account any stamp duty, transaction costs and management fee rebates. Past performance is not a reliable indicator of future performance.

**ABOUT THE INVESTMENT MANAGER**

**MLC**

MLC has been looking after the investment needs for generations of Australians. MLC believes the best way to manage portfolios is to employ the skills of multiple specialist investment managers.

MLC’s investment experts research hundreds of investment managers from around the world and select the managers they believe are the best for their portfolios.

MLC’s investment experts have extensive knowledge and experience at designing and managing portfolios using a multi-manager investment approach.

MLC’s investment experts do this by:

- Adjusting the allocations to the asset classes away from the benchmark asset allocation, while aiming to remain within the defined ranges.
- Researching and selecting a broad range of mainstream asset classes, and including some exposure to alternative assets and strategies.
- Researching hundreds of investment managers from around the world and selecting the managers they believe are the best for the Portfolio. These investment managers, who are mainly active managers, choose many companies and securities in Australia and overseas for investment.

MLC makes sophisticated investing straightforward.

<sup>3</sup> Other costs relating to the operation of the Investment Option can be charged directly to the Investment Option or reimbursed to Futurity if paid by the Management Fund e.g. acquisition, disposal, valuation and transaction costs, such as brokerage, state duty, insurance, custody, as well as auditor, actuary and legal fees. They are reflected in the Unit Price and capped to a maximum of 0.1% pa, with any excess absorbed by the Management Fund.

**GENERAL MARKET UPDATE**

The March 2026 quarter marked a sharp turning point for global markets, dominated by a rapid escalation in Middle East tensions and the effective closure of the Strait of Hormuz. The resulting 60%+ surge in oil prices materially altered the inflation and interest rate outlook, triggering a broad “risk off” repricing across equities, bonds and currencies.

Global equities fell over the quarter, with the MSCI World ex Australia declining around 3.7%. Markets most exposed to global growth and oil imports—Europe, Japan and Emerging Markets were hardest hit, while the US proved comparatively resilient given its status as a net energy exporter. Sector leadership reversed abruptly: energy significantly outperformed, while materials, industrials, IT and small caps gave back earlier gains as growth optimism faded and real bond yields rose.

Australian equities declined modestly over the quarter despite a solid start to the year. Rising inflation pressures, higher bond yields and two RBA rate hikes weighed on sentiment, particularly across REITs, banks and mid small caps. Resources earnings remained supportive but were insufficient to offset broader valuation pressure.

Bond markets experienced one of their weakest quarters in years as markets shifted from expecting rate cuts to pricing the possibility of further tightening. Australian 10 year yields moved briefly above 5% for the first time since 2009.
