		Investment Risk Rating[*]	High – 6
			

Investment Objective, Strategy and Benchmark

To outperform (before fees and tax) the Investment Option's Performance Benchmark – a weighted average mix of market indices relevant to the Option's long-term strategic asset allocation. It may invest in one or multiple UMFs and/ or directly invest in Authorised Investments to have an actively managed high growth portfolio.

¹ Total Management Fees is provided on an after-taxation basis and comprised of the Futurity Management Fees and UMF Investment Fees (includes the estimated UMF indirect costs) – see 'Fees and Other Costs' – Part A of PDS.

² Longer investment timeframes maximise the benefits of investment compounding, especially for medium and higher taxed investors doing this under an Education Bond's Tax-Paid investment structure. Education Bonds also have an 'Investment Bond 10-Year Advantage' meaning the benefits of Tax-free access to your Bond after 10 years from its Commencement Date, subject to certain conditions as explained in Part A of our PDS.

^{*} Performance is measured by Investment Option price movements (after Tax and Management fees). It is quoted using the sell (exit) price and is net of all portfolio taxes, management fees, and fund expenses, however does not take into account any stamp duty, transaction costs and management fee rebates. Past performance is not a reliable indicator of future performance.

ABOUT THE INVESTMENT MANAGER
Pendal Institutional Limited

Pendal Institutional Limited (Pendal) is an independent, global investment manager focused on delivering superior investment returns for its clients through active management.

Pendal offers investors a range of Australian and international investment choices including shares, property securities, fixed income and cash strategies, as well as multi-asset and responsible investments. To complement its in-house expertise, Pendal also partners with leading global investment managers.

Pendal operates a multi-boutique style business across a global marketplace through a meritocratic investment-led culture. Its experienced, long-tenured fund managers have the autonomy to offer a broad range of investment strategies with high conviction based on an investment philosophy that fosters success from a diversity of insights and investment approaches.

Pendal's investment teams are supported by a strong operational platform across risk and compliance, sales, and marketing and operations, allowing fund managers to focus on generating returns for Pendal's clients.

Pendal is a wholly owned subsidiary of Pendal Group Limited. Listed on the Australian Securities Exchange since 2007 (ASX: PDL), Pendal Group Limited is one of Australia's largest and most enduring pure investment managers with offices in Sydney, Melbourne, London, Dublin, Prague, Singapore, New York, Boston, Richmond and Berwyn.

³ Other costs relating to the operation of the Investment Option can be charged directly to the Investment Option or reimbursed to Futurity if paid by the Management Fund e.g. acquisition, disposal, valuation and transaction costs, such as brokerage, state duty, insurance, custody, as well as auditor, actuary and legal fees. They are reflected in the Unit Price and capped to a maximum of 0.1% pa, with any excess absorbed by the Management Fund.

n/a As these Investment Options have only recently been established, no return data is available.

GENERAL MARKET UPDATE

Global markets ended 2025 on a resilient note despite heightened geopolitical uncertainty and shifting monetary policy expectations. Developed market equities delivered solid gains, with the MSCI World ex-Australia up 0.8% in December 2025 and 21.2% for the calendar year. A key theme was the rotation away from US exceptionalism as early-year tariff concerns, political instability, and a weaker USD weighed on sentiment. Nonetheless, strong spending by higher-income households and robust Artificial Intelligence driven capital investment supported a recovery in US equities and earnings growth.

Europe was a strong performer, propelled by fiscal loosening and optimism around infrastructure and defence investment, particularly in Spain and Italy. Japan reached multi-decade market highs, supported by pro-growth reforms and a weak yen. Emerging markets outperformed developed peers for only the

third time in nine years, rising 33.6%, fuelled by falling inflation, capital inflows, and Artificial Intelligence -related semiconductor demand—especially in Korea and Taiwan.

Australian equities lagged global benchmarks, gaining 10.3% for the year, though December 2025 saw strong performance in banks and resources. Interest rate expectations flipped sharply as inflation surprised to the upside, prompting renewed caution on domestic economic momentum.

In fixed income, global bond markets navigated mixed yield movements despite major central-bank rate cuts. Commodity markets saw gold and copper surge, while Brent crude remained under pressure. The USD posted its weakest year in a decade, supporting diversified currency exposures.
