Investment Objective, Strategy and Benchmark

To outperform (before fees and tax) the Investment Option's Performance Benchmark – S&P/ASX 300 Accumulation Index. It may invest in one or multiple UMFs and/or directly invest in Authorised Investments to have a diverse actively managed portfolio of predominately Australian Equity Investments.

¹ Total Management Fees is provided on an after-taxation basis and comprised of the Futurity Management Fees and UMF Investment Fees (includes the estimated UMF indirect costs) – see 'Fees and Other Costs' – Part A of PDS.

² Longer investment timeframes maximise the benefits of investment compounding, especially for medium and higher taxed investors doing this under an Education Bond's Tax-Paid investment structure. Education Bonds also have an 'Investment Bond 10-Year Advantage' meaning the benefits of Tax-Free access to your Bond after 10 years from its Commencement Date, subject to certain conditions as explained in Part A of our PDS.

* Performance is measured by Investment Option price movements (after Tax and Management fees). It is quoted using the sell (exit) price and is net of all portfolio taxes, management fees, and fund expenses, however does not take into account any stamp duty, transaction costs and management fee rebates. Past performance is not a reliable indicator of future performance.

GENERAL MARKET UPDATE

Risk assets performed well in the September 2025 quarter, buoyed by the US Federal Reserve's first interest rate cut of the year and resilient global economic data despite policy uncertainty and geopolitical risks. US growth remained robust, despite the impact of tariffs. However, inflation proved sticky, rising in the UK and Australia, perhaps signalling the end of global rate-cutting cycles.

Developed market equities rallied, led by Hong Kong's Hang Seng (+7.1%) and Japan's Nikkei (+5.2%). US markets hit record highs, driven by AI optimism and the US Federal Reserve's 25bps cut to 4.25%, lifting the S&P 500 by 3.6%. Conversely, Australia's ASX 200 fell 1.4% as inflation surprised on the upside, forcing the Reserve Bank of Australia held interest rates at 3.60%, erasing expectations of cuts.

Credit markets stayed strong, with spreads near record lows. Australian credit remains supported with households remaining resilient, supported by rising real wages, falling mortgage rates, and tax relief.

Australian bonds weakened as CPI jumped to 3.0% year on year in August 2025, ending hopes of a Reserve Bank of Australia interest rate easing in the quarter. Two-year yields rose 15bps to 3.48%, while 10-year yields edged up to 4.29%. In contrast, US bonds rallied, with yields falling modestly after the US Federal Reserve's interest rate cut.
