Investment Objective, Strategy and Benchmark

To outperform (before fees and tax) the Investment Option’s Performance Benchmark – S&P/ASX 300 Accumulation Index. It may invest in one or multiple UMFs and/or directly invest in Authorised Investments to have a diverse actively managed portfolio of predominately Australian Equity Investments whilst adopting a lens based on social, environmental, ethical, responsible investing and financial credentials.

¹ Total Management Fees is provided on an after-taxation basis and comprised of the Futurity Management Fees and UMF Investment Fees (includes the estimated UMF indirect costs) – see ‘Fees and Other Costs’ – Part A of PDS.
² Longer investment timeframes maximise the benefits of investment compounding, especially for medium and higher taxed investors doing this under an Education Bond’s Tax-Paid investment structure. Education Bonds also have an ‘Investment Bond 10-Year Advantage’ meaning the benefits of Tax-Free access to your Bond after 10 years from its Commencement Date, subject to certain conditions as explained in Part A of our PDS.
 * Performance is measured by Investment Option price movements (after Tax and Management fees). It is quoted using the sell (exit) price and is net of all portfolio taxes, management fees, and fund expenses, however does not take into account any stamp duty, transaction costs and management fee rebates. Past performance is not a reliable indicator of future performance.

ABOUT THE INVESTMENT MANAGER

Australian Ethical

Australian Ethical is one of Australia’s leading ethical fund managers. By investing responsibly, Australian Ethical delivers competitive financial performance to their clients and positive change to society and the environment.

Since inception in 1986, the Ethical Charter has guided all investment decisions and underpinned their business practices. Every year 10 per cent of Australian Ethical profits (after tax and before bonuses) are distributed to charitable organisations and social impact initiatives through The Australian Ethical Foundation

GENERAL MARKET UPDATE

The March 2026 quarter marked a sharp turning point for global markets, dominated by a rapid escalation in Middle East tensions and the effective closure of the Strait of Hormuz. The resulting 60%+ surge in oil prices materially altered the inflation and interest rate outlook, triggering a broad “risk off” repricing across equities, bonds and currencies.

Global equities fell over the quarter, with the MSCI World ex Australia declining around 3.7%. Markets most exposed to global growth and oil imports—Europe, Japan and Emerging Markets were hardest hit, while the US proved comparatively resilient given its status as a net energy exporter. Sector leadership reversed abruptly: energy significantly outperformed, while materials, industrials, IT and small caps gave back earlier gains as growth optimism faded and real bond yields rose.

Australian equities declined modestly over the quarter despite a solid start to the year. Rising inflation pressures, higher bond yields and two RBA rate hikes weighed on sentiment, particularly across REITs, banks and mid small caps. Resources earnings remained supportive but were insufficient to offset broader valuation pressure.

Bond markets experienced one of their weakest quarters in years as markets shifted from expecting rate cuts to pricing the possibility of further tightening. Australian 10 year yields moved briefly above 5% for the first time since 2009.
