**Investment Objective, Strategy and Benchmark**

To outperform (before fees and tax) the Investment Option’s Performance Benchmark – S&P / ASX 300 Accumulation Index. It may invest in one or multiple UMFs and/or directly invest in Authorised Investments to have a diverse portfolio of predominately Equity Investments selected based on social, environmental, ethical, responsible investing and financial credentials.

<sup>1</sup> Total Management Fees is provided on an after-taxation basis and comprised of the Futurity Management Fees and UMF Investment Fees (includes the estimated UMF indirect costs) – see ‘Fees and Other Costs’ – Part A of PDS.  
<sup>2</sup> Longer investment timeframes maximise the benefits of investment compounding, especially for medium and higher taxed investors doing this under an Education Bond’s Tax-Paid investment structure. Education Bonds also have an ‘Investment Bond 10-Year Advantage’ meaning the benefits of Tax-Free access to your Bond after 10 years from its Commencement Date, subject to certain conditions as explained in Part A of our PDS.  
<sup>\*</sup> Performance is measured by Investment Option price movements (after Tax and Management fees). It is quoted using the sell (exit) price and is net of all portfolio taxes, management fees, and fund expenses, however does not take into account any stamp duty, transaction costs and management fee rebates. Past performance is not a reliable indicator of future performance.

**GENERAL MARKET UPDATE**

The June 2024 quarter was reasonable for Global Equities and Emerging Markets, with the MSCI World (Hedged) and MSCI EM indices gaining 2.9% and 2.6%, respectively. The US equity markets were driven by the technology sector. It was further boosted by strong earnings reports and favorable investor sentiment, supported by continuous innovation and growth prospects in artificial intelligence.

Political activities filtered through investment markets, having impact on both US and European bond yields. US Treasury Yields were impacted because of below-consensus inflation data in the US, despite some intra-month volatility. Political developments in the US placed upward pressure on yields towards the end of the quarter.

Australian shares fell by 1.2% over the June 2024 quarter, as measured by the S&P/ASX 300 Accumulation Index. The RBA maintained the official cash rate at its June 2024 meeting at 4.35%. Australian inflation remains elevated, with declines losing momentum in recent economic data. The RBA reiterated their commitment to bringing inflation to target.

The Australian 10-year Government bond yield ended June 2024 at 4.32%. The US 10-year Government bond yield ended June 2024 at 4.36%.

The Australian Dollar (AUD) appreciated by 2.4% against the USD over the June 2024 quarter, ending the quarter at 66.8 US cents.
